	Water soluble (Zn)	0.019%

Description

Osmocote® Exact Standard 5-6M is an exceptionally safe product, making it well suited to pot plants. This provides real control over the nutrient supply to the plant, thanks to the product's patterned release. The granules are different colours, depending on their longevity to avoid mixing.

Benefits

- \\ Ideal for pot plants, with a slightly shorter nutrient release period than Osmocote® Exact Standard 8-9M
- \\ Safe: controlled release and high level of all essential trace elements
- \\ Consistent: each bag gives identical results
- \\ Tailored release pattern: exactly suited to your crop's requirements for optimal growth

How to use

- 1 The temperature affects Osmocote® Exact Standard longevity, determined at 21°C. 16°C: 5-7M
21°C: 5-6M 26°C: 4-5M.
- 2 Close partly used or damaged bags securely.
- 3 Store under dry conditions.
- 4 If you need more information, please contact your technical support.

Application rates

	Light feeding	Normal feeding	Heavy feeding
Container nursery stock	2-3 g/l	3-4 g/l	4-5 g/l
Pot plants	2-3 g/l	3-4 g/l	4-5 g/l

Recommended application rates for Osmocote® Exact Standard granules in g/l How to calculate the granules per pot or container at the application rates above: - Granule application - 3-liter pot volume - 5 g/l Osmocote® Exact Standard Total = 15 g/pot Attention The recommended rates above are based on unfertilised substrates. These are general recommendations. Adjust for specific situations, such as use in tunnels or greenhouses, autumn or winter pottings, or specific climate conditions. Contact your ICL Specialty Fertilisers advisor for more detailed advice. Trial first on a small scale before changing the rate, application or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be held responsible for any adverse results.

Attention
